***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10-09-2007 has been entered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-47 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 23, the phrase "which holds a relative position of the 2<sup>nd</sup> cylindrical member with respect to the forceps channel of the endoscope" seems to positively recite the forceps channel and the endoscope. The scope of the claim is unclear because some parts of the claim indicate that these elements are not part of the claimed system. If they are not to be considered

part of the claimed system, then the examiner suggests changing the language to “for holding...”.

For the purposes of applying art, the examiner contends that the cope of the claims include the channel and endoscope.

### ***Claim Objections***

Claims 24 and 26 are objected to because of the following informalities:

In claim 24, there is no clear antecedent basis for “the inner cylinder”.

In claim 26, there is no clear antecedent basis for “the outer cylinder” and “the cylindrical member”.

Appropriate correction is required.

### ***Double Patenting***

Applicant is advised that should claims 1-22 be found allowable, claims 23-44 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Del Toro-5733267. Del Toro discloses a stent delivery system having an inner cylindrical member slidably housed within an outer cylindrical member. A stent is housed in the space between the members. A holding mechanism 40 attaches to both members and if the claims were amended to only functionally recite the holding mechanism as being capable of holding the inner cylindrical member relative to the channel of an endoscope, then the examiner would apply this reference against the claims, as the examiner contends that if the outer cylindrical member were placed into a forceps channel of an endoscope having an forceps cap on its opening, then the outer cylinder would be held by friction relative to the forceps channel of the endoscope and through the holding mechanism 40 the inner cylindrical member would also be held relative to the channel of the endoscope.
